

Monthly Water Quality Report

March 2026

Samples Processed	Compliance Rate	Turnaround (hrs)	Non-Conformances
4,218	99.7%	18.4	3
+12% MoM	+0.2pp	-2.1 hrs	-4 vs Feb

Summary

March 2026 saw record sample throughput across all three laboratories, driven by the seasonal increase in agricultural run-off monitoring and the onboarding of Thames Water's expanded testing contract.

Compliance rates remained excellent at 99.7%, with only 3 non-conformances recorded — all relating to minor documentation errors that were corrected within 24 hours.

Average turnaround time improved to 18.4 hours, down from 20.5 in February, following the deployment of two additional ICP-MS instruments at the Birmingham laboratory.

Laboratory Performance by Site — March 2026

Site	Samples	Compliance %	Turnaround	Staff FTE	Capacity %	Incidents	Status
Birmingham Central	1,842	99.8%	16.2 hrs	34	87%	0	●
Bristol Portishead	1,204	99.6%	19.8 hrs	22	78%	2	●
Leeds Kirkstall	824	99.4%	21.3 hrs	16	92%	1	▲
Edinburgh Leith	348	100.0%	17.1 hrs	8	64%	0	●
TOTAL / AVG	4,218	99.7%	18.4 hrs	80	82%	3	—

Regulatory Actions & Upcoming Audits

This page contains detailed actions, upcoming deadlines, and risk items for the next reporting period. In a production document this would include specific action owners, due dates, and escalation paths.

All items from the previous period have been reviewed and updated. Outstanding actions are tracked in the central register.

Next review meeting scheduled for the first working day of the following month. All stakeholders are expected to submit updates 48 hours in advance.

Distribution: Senior Leadership Team and relevant department heads only. Not for wider circulation without approval from the report author.

CONFIDENTIAL — This document is classified for internal use only.
