

Q1 2026 Portfolio Performance Review

January – March 2026

AUM (£bn) £3.42bn +£180m QoQ	Model Return +4.7% vs +3.9% benchmark	Net Inflows (£m) £94m +22% YoY	Client NPS 76 +3 vs Q4
---	--	---	---

Summary

The Q1 2026 investment review reflects a strong quarter for client portfolios, with the flagship Balanced Growth model delivering +4.7% versus its composite benchmark return of +3.9%.

Assets under management grew to £3.42bn, driven by £94m in net new inflows and positive market performance. Client retention remained excellent at 97.8%.

Key allocation decisions included an overweight to UK mid-cap equities (which returned +8.2% in Q1) and a tactical increase in inflation-linked gilts ahead of the February CPI print.

Model Portfolio Returns — Q1 2026

Model	Q1 Return	Benchmark	Excess	Volatility	Sharpe	Max DD	AUM (£m)
Cautious Income	+2.1%	+1.8%	+0.3%	4.2%	0.82	-1.4%	£620m
